

*Coming Together to Better Support
Families of Registrants*

We recognize the stigma and collateral consequences of the registry and know that families can often feel isolated and helpless. We are planning to hold a family support session the night prior to the annual conference of the local Florida chapter of the Association for the Treatment of Sex Abusers (FATSA) for anyone who may wish to attend. Attendees can look forward to an open and safe place in which they can share their experiences and challenges as family members of registrants. Most importantly, we can brainstorm ideas for better addressing the needs of those directly and indirectly impacted by these policies.

We look forward to working together to provide accurate research for policy reform and meaningful services for families impacted by these laws. We look forward to meeting and working with you.
